Lacombe Cattle Feeders Hold First Big Field Day

That keenest interest is being taken in the business of stock feeding in this district, was evidenced by the crowd who attended the annual Feeders' Day held last Thursday under ideal weather conditions.

Principal speakers were S. G. Carlyle, livestock commissioner; Professor Sackville, University of Alberta, and L. B. Thompson, superintendent range experimental station, Manlyberries.

Meeting at the Lacombe experimental station, the motorcycle, headed by G. E. DeLong, president of the Board of Trade, and chairman of the day's program; F. H. Reed, superintendent, and H. E. Wilson, livestock superintendent, experimental station, made the first stop at the farm of Charles R. Abbott, where the various feeders were introduced. These were: C. R. Abbott, Leslie Pearce, William Meldrum, John Henderson, Alex. Wilson, Chigwell; Ted Simons, Oliver, John Laing, Blackfalds and three Red Deer feeders, J. P. McKinnon, James A. Jarvis and R. A. Van Slyke, also William Sinclair, of Bowden.

These men explained the different methods of grain used, the various methods of feeding employed and the results obtained.

Sam Henderson, supervisor for the district, briefly stated the advantages gained by converting coarse, cheap grains into a highly finished product desired in the British market. Bread does not matter, he stated, but small thick type of cattle are needed for export beef trade.

Following a substantial picnic dinner on Mr. Abbott's farm, F. H. Reed, on behalf of the Board of Trade presented Mr. and Mrs. Abbott with an enlarged picture of their home.

C. H. Gilchrist and Harry Miner, ranchers from the south coast, and A. McGill of Canadian Pacific Railway freight traffic department were introduced.

Hon. Irene Paribby offered congratulations to the feeders and stated that their business was one of the most valuable pieces of work in an agricultural community.

There are three angles to the undertaking, said E. Ward Jones of Calgary. First, the necessity of good type of cattle to feed, second, feeders must be livestock minded; third, organization. Large calves he maintained made better growth and cheaper gains than yearlings or two-year-olds.

S. G. Carlyle felt he could say with out flattery, Lacombe district has the best feeders' organization in the province. Markets, tariff and embargo had affected progress of the venture, but the outlook is now brighter. Alberta is an important meat producing province, and with removal of a lowered tariff arises the problem of competition from the American feeder and this must be met by producing highly finished article for market, he stated.

L. B. Thompson discussed the question from growers' viewpoint, methods of feeding and heavy investment.

Popular Young Couple Wed

DOUGLAS-FRIZELL

The beautiful grounds and spacious home of Mrs. A. Frizell, of Iowalla, was the scene of a pretty wedding at one o'clock Wednesday afternoon, June 14, when her daughter Mary Mackay Frizell, became the bride of Mr. Leonard S. Douglas, of Lacombe, Rev. R. B. Layton officiating. The wedding ceremony was performed on the lawn, the principals standing under an arch of lilacs tied with white ribbon and centred with a large white ball.

As she crossed the lawn on the arm of her brother, Mr. Reuben Frizell, who gave her in marriage, the bride was a charming picture in her gown of white silk crepe with net yoke and sleeves and a long veil, held in place with a wreath of orange blossoms. The best man was attended by his sister, Miss Jenny I. Frizell, whose dress was of figured yellow georgette with large picture hat to match. The bride carried a bouquet of Madame Butterfly roses and a bridesmaid's bouquet of pale pink carnations with mauve sweet peas. Mr. Lee Pillman attended the groom.

The wedding march was played by Miss Molly Watson.

Sixty-five guests sat down to the wedding breakfast tables decorated with tall yellow candles, yellow carnations and streamers, and the wedding cake topped with small white doves, centering the bride's table. J. N. B. MacDonald presided, the toast to the bride.

Following the wedding breakfast, Mr. and Mrs. Douglas left by motor for Calgary and Banff, the bride travelling in a brown suit trimmed with fur with hat and accessories to match. They expect to return by the east-highway and Edmonton, and will take up their residence in Lacombe.

Lacombe Baseball Team Wins Four Straight Games

This year Lacombe has one of the best baseball teams it has ever had. It is consistently winning its games and is now high up in the league standing. Although they are making a great showing, they are not receiving the support that is due to them. On the night of the home games here, very small crowds are in attendance, which is not at all encouraging to the players. Besides, lovers of baseball, can see as good a game here as they could anywhere else in Alberta. The Lacombe diamond was put in first class shape this Spring and it can truthfully be said that it is the best diamond on the line. Our battery is exceptionally good as is every man on the lineup. In the first game, the Lacombe team they have won four. The scores in all these games were big in Lacombe's favor, with the single exception of the first game. In the first game played in the league, Lacombe beat Mornington 1 to 0. In the second game, Lacombe beat Blackfalds 6 to 5. In the third game, Lacombe beat Bentley 12 to 4, and in the last game Lacombe beat Blackfalds 9 to 0. The league is a perfect record and it is hard to equal. All teams in this league are fast and to accomplish what our team has is no small matter. The next league game here is on Thursday, June 22 (tonight) and the league is expected to all should attend and back your team.

In a fast exhibition game at Miror Lacombe played that speedy eastern team to a 7-1 tie which could not be broken in 11 innings. Mirror's team is fast but our team is just as fast.

Remember, the games are all called for 8:30 sharp, so be there early.

BASEBALL
The Goddess of Luck unfortunately did not favor Casey's baseball team at Gull Lake on Sunday last, when his boys tangled with the Bentley All-Stars. Bentley romped off with the pennant by piling up the job-sided score of 7 runs to Casey's 1. A large and enthusiastic crowd were in attendance at the park to witness the game. The Bentley batters started hitting early and kept the outfielders on the gallop nearly every inning. Gee, those Bentley batters, could sure hit. Casey's fielders did plenty of good work and made many sensational catches. Although they had a big hit plenty of them too, it always seemed that there was a Bentley man under the ball when it came down. Johnny Bennett, out in right field

St Andrew's Choir Receives Recognition

A recognition banquet to St. Andrew's Church Choir who won first place in Church choir event and second place in small town choir event at the Edmonton Festival, was tendered by the Ladies' Guild on Thursday evening, June 15th. Members of the Official Board were also guests and Mr. P. W. Pratt, Chairman, expressed the congratulations of the Board and their gratification over the achievement of the Choir. Mr. R. Rhind, President of the Choir and Mr. Thomas Wilkes, voiced the thanks of the choir, and Mr. L. D. Wright, their leader, thanked the members for their cooperation and for the prevailing spirit of harmony. Mr. G. E. DeLong moved a vote of thanks to the Ladies' Guild for this delightful gesture on their part, which was seconded by Mrs. G. P. Johnston, and tendered by Rev. R. B. Layton, Chairman of the program, to Mrs. G. P. Vickers, President of the Ladies' Guild, who fittingly responded.

Several accidents have happened recently, fortunately without very serious results, caused by automobiles running out of cross streets onto the main highway and meeting traffic from north and south. Some of these days there will be a serious crash unless something is done to overcome the menace. It would be a good move on the part of our council to make every street opening onto the highway a "stop" street, and it can be done with very little expense. Nearly every town in the Province, through which the highway runs, has taken the necessary steps to provide this safety measure, and it will be welcomed by motorists in general. Now is the time to move, as traffic is getting heavier every day.

STOP STREETS

There has for some time been a sentiment that a good cigar is a smoke but on this continent at least it is the cigarette that, if it had its rights would be accorded acclaim, for the cigarette is doing a lot for governments in the way of bringing them in revenue. The pipe is not what it used to be, but whether this is due to the neighbors' complaints or to an improvement in human nature, statistics do not disclose. Cigars in the United States have fallen off in numbers consumed during the past decade by 40 per cent. in absolute numbers, and 45 per cent. relatively. But cigarettes have increased in use two and a half times over in that period. In Canada in that time the cigars taken out of bond fell from 270,089,761 to 177,841,987, and the quantity of tobacco from 23,040,012 to 22,520,345 pounds. Consumption of cigarettes has increased in this time from 2,440,992 to 5,982,314,500.

This country is going in for growing its own tobacco. There are now 103 establishments processing it with some 5200 employees, and a wage schedule of \$8.00 per week. In 1931, the last recorded year, the tobacco crop was 51,300,000 pounds from 56,000 acres as compared with 36,713,000 pounds from 41,444 acres the previous year. Most of the area producing tobacco is in Ontario, 47,360 acres with Quebec next with some 7000 acres. The other provinces are just getting into the growing game. It must be doing something also for the lighter and match business.

MADAME BUTTERFLY AT THE AVALON

"Madame Butterfly," Paramount modernized screen version of the famous love classic plays at the Avalon this week.

The film is based on the life of the real Madame Butterfly, a beautiful Japanese Geisha girl. Falling in love with an American officer, she throws over the customs and traditions of her Nipponese ancestry to marry him. After several months of marital bliss, he sails back to the States, promising to return.

Madame Butterfly waits faithfully despite the entreaties of her family to remarry. Finally her lover returns, but under circumstances which bring a touching, unusual climax.

Sylvia Sidney has the title role. She is supported by Cary Grant, especially known for his high-born "Blonde Venus," and the humorous Charlie Ruggles. Irving Pichel and Helen Jerome Eddy are also in the cast. Marion Gering directed.

Coming: George Arliss, in "A King's Vacation," June 29, 30, July 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

Now You Can Paint Up at a Low Price

Those contemplating painting their premises this spring, will be able to do so at unusually low prices. Messrs. Morrison & Johnston, Ltd., will from June 24th until June 30th, supply Marshall-Wells High Grade House paint, regularly selling at \$4.00 per gallon, at the bargain price of \$2.00 per gallon. You may also purchase 2 gallons of White Paint for \$5.00, regular price \$6.00 per gallon. It will pay to take advantage of this great offer.

Holstein Men Meet Here

A sign of improved agricultural conditions in Canada in the first five months of 1933 as compared with the similar period of the preceding year was shown those who attended the annual meeting of the Alberta section of the Holstein Friesian Association, at Lacombe.

E. Ward Jones, representative for the province on the executive reported that the surplus of the association over operating costs was \$11,000 greater than that of last year. All provinces, save one, had increased memberships this year, he stated.

Harry Hays, seasonal fieldman, and J. H. Hays, secretary-treasurer for the association in this province, presented reports which showed an intensive effort to forward the interests of the breed here and the enlisting of an appreciable number of new devotees of black and white cattle.

Other speakers were H. A. Craig, deputy minister of agriculture; Frank Reed, superintendent of Lacombe Experimental Station; Dr. E. E. Hays, Calgary; Dr. J. E. Bowstead, University of Alberta.

At the conclusion of the meeting, the Holstein breeders visited herds of the Canadian Junior College, Lacombe, and H. and C. P. Elwell, Blackfalds.

J. W. Hosford, Strathcona, was re-elected president of the Alberta body, with H. A. Craig as honorary president of the Alberta body, with H. A. Craig as honorary president.

Dr. T. A. Hays was named as executive member from Calgary and J. A. Hays, Strathcona, was re-elected secretary-treasurer.

THAT PATRIOTIC CIGARETTE

There has for some time been a sentiment that a good cigar is a smoke but on this continent at least it is the cigarette that, if it had its rights would be accorded acclaim, for the cigarette is doing a lot for governments in the way of bringing them in revenue. The pipe is not what it used to be, but whether this is due to the neighbors' complaints or to an improvement in human nature, statistics do not disclose. Cigars in the United States have fallen off in numbers consumed during the past decade by 40 per cent. in absolute numbers, and 45 per cent. relatively. But cigarettes have increased in use two and a half times over in that period. In Canada in that time the cigars taken out of bond fell from 270,089,761 to 177,841,987, and the quantity of tobacco from 23,040,012 to 22,520,345 pounds. Consumption of cigarettes has increased in this time from 2,440,992 to 5,982,314,500.

This country is going in for growing its own tobacco. There are now 103 establishments processing it with some 5200 employees, and a wage schedule of \$8.00 per week. In 1931, the last recorded year, the tobacco crop was 51,300,000 pounds from 56,000 acres as compared with 36,713,000 pounds from 41,444 acres the previous year. Most of the area producing tobacco is in Ontario, 47,360 acres with Quebec next with some 7000 acres. The other provinces are just getting into the growing game. It must be doing something also for the lighter and match business.

Gull Lake Residents Prepare For Best Season's Business

Large numbers of holidaymakers are expected at the lake this summer. Allied and practically all the cottages have been rented. The fine weather of the past week has attracted many tourists to the lake. Almost daily throngs of bathers take advantage of the government bath-houses and the spring-boards on the end of the government pier are occupied constantly. The extremely hot weather of last week warmed the water of the lake and now swimming is a real pleasure. The sports club which was formed at the lake recently is planning a real program for a summer season. The members of the club is enthusiastic, and should do much to make the lake a brighter spot to holiday. The government park is now in lovely shape, and the camp kitchens and public bath-houses a real convenience to the campers. Mr. Berg, who is in charge of the government property is a tireless worker and does all in his power to make things congenial for the visitors.

In anticipation of the large crowds in prospect this summer, all the stores have stocked up heavily with all the necessities and luxuries for the campers.

Mrs. Jones, who recently took over the store of Otto Weidner is now ready for the season's trade. She has as up-to-date ice cream parlor in connection with the store. Soft drinks of all kinds are carried. In connection with the store is a full line of summer novelties, and toys. A full line of groceries as well as fresh fruits and vegetables of every description. Mrs. Jones invites you to call around and visit her modern store.

Mr. L. Sandbrook who is always first at the beach is doing a rushing business. His ice cream parlor was redecorated this Spring and is now a real credit to the lake. The place is Frigidian equipped and the whole equipment is ultra-modern. A soda fountain second to none in the province is installed and Mr. Sandbrook is now ready and prepared to serve the public with their wants in the refreshment line. A full line of candy and confectionery is always carried as well as tobacco and cigarettes. The new annex to main building is completely renovated and has been converted into a carol bedroom and a kitchen, diningroom and spacious livingroom. These rooms are rented at a most reasonable price and roomers have the free use of the kitchen and dining room. Visit this place as an asset to the beach. Mr. Sandbrook will be pleased to show you around.

Otto Weidner, another old stand-by can look after your wants with wood and ice, and have a large supply of help. Prompt service is assured at all times, day or night.

Mr. E. A. Jenkins, whose place of business is centrally located is prepared to cater to your wants in the line of milk, cream, etc. He is also prepared to supply you with wood and ice. Mr. Jenkins invites all prospective customers to visit his most modern and sanitary dairy. He guarantees satisfaction.

Mrs. Geo. Remie has put in a complete stock of groceries for the summer trade and awaits your business. In connection with her store is the telephone office and post office. Their large dance hall will be opened soon and a real dance orchestra has been engaged for the summer and regular dances will be held. You can also purchase gasoline and oil at this establishment.

Jimmy Mitchell's store at the south end of the beach is now open for the summer trade with a full line of groceries, confectionery, etc. A modern ice cream parlor and soda fountain is also operated in connection with the store. Visit this nice little store when you are at the lake.

Ebelings Lakeview Camp is a mecca for hundreds of picnickers weekly. Mr. Ebeling has a beautiful camp grounds with tables set in under the huge shade trees. Several cabins have been built under the trees, and a real holiday can be spent here. An ice cream parlor and store is operated on the grounds for the refreshment of visitors. When you come to the lake be sure and visit this lovely camping place.

The "Old Reliable" John Hug is there as usual to look after your every need in the line of milk, cream, butter, eggs, vegetables, etc. Mr. Hug has catered to needs in the above lines at Gull Lake for many years and can be depended upon to give you the utmost satisfaction. He has a large herd of certified cows, and his dairy is very modern and sanitary, he invites you to call and inspect his place.

The McDonald Tourist Restaurant will be open as usual and tourists are assured of clean, comfortable accommodation at most reasonable rates.

NO MORE MIDNIGHT FROLICS IN ALBERTA

Minors under 18 years of age will not be admitted to an entertainment hall where public dances are held unless accompanied by a parent or guardian, according to regulations passed under the Provincial Theatres Act and made public on Thursday by Edmund Townbridge, deputy provincial secretary.

The regulations further provide that in any entertainment hall where dances are held there will be, generally speaking, no dancing between 1:00 a.m. and 8:00 a.m.

The clause dealing with this phase of activity reads as follows: "In any entertainment hall where dances are held, dancing is prohibited between midnight on each Saturday and 8:00 a.m. on the following Monday and between 1:00 a.m. and 8:00 a.m. on each Tuesday, Wednesday, Thursday and Friday."

It is generally believed the purpose of this regulation was to restrict the noise consequent upon late dances and to permit residents in the district in which a dance hall is situated a reasonable amount of rest and sleep undisturbed by the dancers.

KILLING OF BOYS MAY BE MURDER

Regina, June 18. With rumors of foul play growing steadily Assistant Commissioner S. T. W. Wilson, of the Royal Canadian Mounted Police at Regina, has ordered a further investigation into the killing of three Regina youths by a freight train near Red Deer, a week ago Saturday.

Enjoy This Finer Quality

"SARAPA" TEA

"Fresh from the Gardens"

Vacation Days.

Schools all over this western land will soon close their doors for the summer months and tens of thousands of boys and girls will joyfully welcome the "holidays."

In offices and shops week by week employees and employees will for longer or shorter periods relinquish their tasks to enjoy their hard earned summer vacation.

Work on the farms will ease up a bit following Spring activities and during the period while the crops grow and ripen for the harvest.

In a word, Western Canada's short playtime period is at hand. It is a time to forget, as far as that may be possible, the worries and difficulties of the months of depression, and for the younger generation in particular every reasonable effort should be made to make the most of the three months as happy and health-giving as possible, with life lived largely in the open.

There will not be much money to spend, and vacation plans will have to be made upon a cheap scale by most people, but that is no reason why these holidays should not be just as enjoyable as if planned in a much more elaborate and expensive way.

Long journeys may be out of the question, but fortunately Western Canada has been blessed by nature with an abundance and variety of lovely summer resorts and camp sites which can be reached easily and at little expense, and where the daily cost of living is extremely low. Such a vacation will serve to remove the strain and worry of school studies and exams, which youth has been undergoing, and blow away the fogs of the depression in which all people, young and old, have been living. It will mean renewed mental and physical vigor.

Fortunately, too, in this year when money is not a plentiful article wherever it makes trips to other provinces or countries, opportunity is being afforded right in the heart of Western Canada for a holiday which combines all the essentials of an enjoyable, worthwhile respite from daily toil—a holiday that will provide relaxation, entertainment and thrills combined with educational features and opportunities never before offered in this Western country, and all at small expense.

Reference is to the World's Grain Exhibition and Conference to be held at Regina during the last week of July and the first week of August. This will be a truly wonderful exhibition, a magnificent enterprise. Over forty nations, states and provinces will be represented in the specially constructed quarter of a million dollar building, having a floor space of 148,000 square feet, and actually miles of exhibits. It will be not only a sight worth seeing, but a great education.

A vacation visit to this great exhibition, which will be the result of three years of intensive preparation, will not be a costly one. For the people of the prairie provinces, the distance to be travelled is short, and specially low rates on the railways will make the journey within reach of most people, even in these days of restricted finances. A huge city of tents will be built adjacent to the exhibition grounds, with modern facilities provided where groups and families can stay at the very minimum of expense, and will constitute an ideal outing for motor parties from all over the land.

Western Canadians, old and young, need not deny themselves a real and enjoyable vacation this summer. They owe it to themselves to take all the enjoyment and recreation they can from the opportunities afforded them. They will be better for it, whether it be the spending of a busy time at some camp or small summer resort, or in a visit to the big world show at Regina. In any event they can get to know their own Western country better than ever before, and to appreciate it and its possibilities, and many of them can combine with it the obtaining of a glimpse of the world, and more especially of those nations which are engaged in the same major activity as the people of Western Canada, namely, agriculture.

So, take a holiday. Pack the family in the old car and hike away to some new scene. Live in the open, rambling over the country side. Go fishing. Let the boys and girls paddle and swim, enjoy out-of-door games, gather around the bonfire at night for an old time sing-song. Everybody will be the better for it.

Iodized Salt For Stock

Procedure For Mixing It At Home Is Simple

Golter in calves and lambs and hairlessness in pigs is prevalent in districts where there is a deficiency of iodine in the soil.

In such districts the use of potassium iodine in the form of iodized salt is advised by the Dominion department of agriculture. Commercial iodized salt can be procured, or, if it is desired to mix it at home, the procedure is simple. Spread out evenly on a clean floor, and after dissolving two ounces of potassium iodine in sufficient water, sprinkle the liquid evenly over the salt.

A good rule in feeding salt to swine is to feed one-half pound per pig per month, varying this according to the size and age of the pigs.

Turks Eat Little Meat

Quantities Of Rice, Bread, and Fish Constitute Meal

One of the best ways of getting to know a man or a nation is to study what he eats. The inhabitant of Constantinople is a big bread eater and a tremendous rice eater. Strangely enough, considering what a fighter he is, he does not go in for meat very much. He will devour at a single sitting huge quantities of boiled corn, Indian corn, stewed barley, haricot beans, lentils, and aubergines. He cooks in olive oil and will eat fish of any freshness—just out of the sea or in the last stages of decomposition.

"How far have you and your wife got in your plan to buy a new car?" "We've got to the point where we don't speak."

Palpitation of the Heart Nerves Bad - Could Not Sleep

Mrs. Fred Bingham, Swift Current, Sask., writes:—"I was bothered with palpitation of the heart, and my nerves were so bad I could not sleep."

I was getting desperate and confided my trouble to a friend who recommended me to use Milburn's Heart and Nerve Pills. I purchased a box and got such relief I would gladly recommend them to all who are troubled as I was."

For sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Winnipeg, Ont.

Has Just Changed Method

Advertising Has Existed From Earliest Days Of Buying and Selling

Advertising, as the London Spectator observes, is not "fancy device or ornament" of modern times; "it has always existed from the earliest days of buying and selling. The town-crier making announcements at the street corner, the hawker shouting his wares to the public, the thronging armies loudly to attract attention in an eastern bazaar—all are advertisers. What has changed in advertising is method. The advertiser stands between producer and distributor, "performing a function which becomes more and more important in proportion as industry is conducted on a larger scale, and as potential consumers are more widely scattered."

To denounce advertising is a pity to denounce trade. The modern salesman—if he would be a salesman—must have recourse to modern advertisement, to make known what he has to sell, and secure the sale of it among potential customers, and to do this as effectively as possible within scientifically determined limits of expenditure. What is this new activity, science or art? It is a science, argues the Spectator, because its agents seek to assess the value of circulation by quantity alone. But it is also an art, for it depends upon appeal to the imagination by means of words and pictures. Both as science, and as art it is one of the outstanding phenomena of our time destined, it may be said, to occupy an even more important place in the life of business and the business of life.—New York Evening Post.

Old Type Freight Boats

Very Few Whalebacks Now Seen On Great Lakes

A dispatch from Chicago reports that the nine passenger steamers of the Goodrich Transit Co., in liquidation were sold subject to liens and mortgages for \$7,500. One of the boats sold was the whaleback passenger steamer "Christopher Columbus" which was sold for the Chicago World's Fair business.

The whaleback type of construction was originated by the late Captain Alexander McDougall, who was born in Collingwood, Ontario, and migrated to Duluth. Capt. McDougall was the first to build a whaleback of this type but most of them went to salt water during the war.

The Christopher Columbus is the world's only whaleback passenger steamer. Her route since 1892 has been between Chicago and Milwaukee.

Very few of the whaleback type of vessels are now seen on the lakes. They were all built on the United States side and none has been launched in perhaps 30 years. The "pigs," as they were called sometimes, had some advantages as bulk freight carriers, but with the development of the modern huge carriers they were found no longer practical.

Improvement Is Noted

Business On Great Lakes Freight Lines Better Than Last Year

Those of us who are eagerly looking for fresh signs of business revival—and who is not?—will be interested in reading the early reports from U.S. Great Lakes shippers.

During the first two weeks of this year's navigation season, more than 450,000 tons of freight moved through St. Mary's Falls Canal, between Lakes Superior and Huron, on the American side. The first two weeks of last year's season sent only 368,000 tons through the canal. While movements are up more than 100 per cent, coal more than 500 per cent, iron ore more than 100 per cent.

Business on the Great Lakes freight lines, quite clearly, is better than it was last year at this time. And one must remember that the lake steamers carry those bulk commodities—coal, iron ore and grain—whose movement is the very backbone of business. If this improvement continues, a good deal of optimism will be justified.—Quebec Chronicle-Telegraph.

Want To Be Jockeys

Feminine horse lovers in England want to ride as jockeys. The fact that there will be more women's races does not satisfy for they want to ride against men, as in Ireland. If given a chance, they believe they can equal the record made at Tipperary two years ago when women riders won four of the five events.

Scientists having routed the dreaded tsetse fly from a large stretch of land in Tanganyika, Africa, a native tribe driven from it 30 years ago has returned.

Two modern skyscraper hotels have just been completed in Shanghai, China.

Robert Louis Stevenson invoked the easy flow of his thoughts by playing the piccolo flute.

NURSE LOSES 7 LBS.

"I weighed 145 lbs.," writes a nurse, "when I bought the bottle of Kruschen salts which I have just finished. I have taken a good half-teaspoon in a glass of hot water every morning. Now I weigh 138 lbs., a loss of 7 lbs. I am very glad to have lost weight, especially without trouble."—M.H.R. (Trained Nurse).

Unlike most salts, Kruschen salt is simply a laxative. When you take Kruschen salts you not only stimulate your liver and kidneys to function naturally and perfectly, but you supply every internal organ, gland, nerve and fibre in the body with Nature's own revitalizing and rejuvenating minerals. Get a bottle of Kruschen salts today, and take one-half a teaspoon in a glass of hot water every morning before breakfast.

Before the bottle is empty you'll feel years younger—eyes will brighten—step grow sprightlier—nerves steadier—you'll sleep sound, enjoy your meals, and after a hard day's work you'll be ready for wholesome recreation—one million women already know all this.

Burning Ten Million Yearly

Figure Given As Forest-Fire Loss In Canada

Figures compiled by the Forest Service of the Department of the Interior show that the annual forest-fire loss in Canada for the ten year period 1922-31 was \$10,000,000. It is something that appeals Canada's forests are among the richest of her heritage, and the fact that we, the trustees of that heritage, should be sending it up in smoke at the rate of \$10,000,000 a year, is a blot upon our capacity as a people. The melancholy aspect of it all is that most of this fire-loss is the result of indifference, of a carelessness that will not heed warning or educational propaganda.

We talk loudly about the exploitation of promoters and about the failures of the newspaper industry, yet all the time we permit or cause a condition which is doing more to ruin our forests than all the capitalists and greedy promoters combined. It is one of the discreditable things in our whole scheme of national economy.—Ottawa Journal.

World Meat Reserve

Experts Believe Reindeer Will Add Greatly To Supply

Experts believe that a great world meat reserve can be established in northern Canada, and that the millions of acres hitherto regarded as waste will give rise to a new and useful and cheap addition to its meat supply. They expect that a vast business organization with a cold storage plant and transport installations will result from the successful migration of the reindeer herd of Alaska.

When the herd has developed sufficiently, timed reindeer meat and reindeer tallow—held to be a great delicacy—will be exported. The animals will be of the greatest use, as they provide their own food, even in winter. They are generally regarded as the most widely versatile animals in the world.

Uncovers Roman Pavement

Farmer's Plough Reveals Rare Find Near English Village

While a farmer named Robson was ploughing in a field at Rudston, a village near Bridlington, England, he noticed that the share turned up tiny squares of colored chalk. His curiosity aroused, he began to dig, and less than two feet below the surface he came across a Roman pavement.

Finally, he laid bare a stretch 54 feet by 15 feet, in which there appeared, with amazing clearness of coloring, the helmeted head of a Roman with floral decorations about it. A representative of the Yorkshire Archaeological Society saw the remains and proposed that they be those of a Roman villa in a good state of preservation. There are two distinct pavements—one trapezoidal and the other in fine scroll work.

What He Wanted

"I don't know about granting you another divorce, Jake," the judge said. "You've had three already and if I grant you another you'll simply go and get married again."

"Oh, no, judge your honor," Jake protested. "I ain't figurin' on that—I just 'wants you to put me out of circulation."

Historic Cottage Sold

Adam Bede's cottage in Derby road, Wirksworth, Derbyshire, England, which was the setting for George Eliot's famous novel, "Adam Bede," has been sold by auction. The property belonged to a resident of Manchester and the new owner is W. Dorey, a local news agent, who paid \$975 for it.

"Did you sleep well, sir?" "Wonderfully! You remember I dreamed the night before last that somebody gave me a bad \$5 note. Well, last night I managed to spend it."

Panama has modified its import duty on perfumery "to encourage tourist trade."

It is true that many families live on less than \$500 a year. That's why merchants go broke.

Shipyards in Belfast, Ireland, are becoming active again.

Freight Shipments By Air

Imperial Airways' Report Shows London-Paris Business Growing

Imperial Airways reports latest available information on the growth of air-borne freight traffic show a definitely favorable trade balance as far as the United Kingdom is concerned. Officials of the company detailed improvement in freight traffic like this:

Goods air-borne between London and Paris during the first three months of this year were 39 per cent, in excess of those for a corresponding period of 1932, while, illustrating the trend of trade, goods exported by air during the first quarter of this year were three times more numerous than those imported.

Altogether, during January, February and March, 1933, more than 200 tons of freight were air-borne between London and Paris.

Considerable increases were also recorded in the weight of mails carried by air from this country during the first three months of this year, while passengers, flying between London and Paris, increased 60 per cent during January, February and March as compared with similar months in 1932.

Traffic also continues to develop briskly on empire as well as on continental routes. Empire air mail loads, for example, show appreciable increases, while traffic generally is growing to such an extent, particularly on sections of our Africa service, that our carrying capacity has been amplified considerably by the employment of large aircraft.

Competing For King's Cup

Aeroplanes Of Many Types Entered For Race July 8

Aeroplanes of many types will race all day over the English countryside, extending 200 miles north of London, when the contest for the king's cup is decided July 8.

Airports, six of which are Royal Air Force stations, have been chosen by the Royal Aero Club as turning points for the race. They are: Feltwell, Bircham, Newton, Cranwell, Desford, Wittering, Henlow and Upper Heyford. Desford is the only civil airfield in the circuit, but Royal Aero Club officials and observers will be stationed at each of the airports to see that the competitors circle the turning points properly.

Starting at Hatfield airport, just outside of London, the race will be down in four rounds, each starting and finishing at Hatfield. Each round will be flown over 200 miles and must be completed in about three hours.

Only British machines, entrants and pilots are allowed to compete, and all pilots, whether amateur or professional, must produce proof of having flown alone for 100 hours before the race. Almost every type of aircraft will be entered in the race, and they will be handicapped according to engine power and performance.

Where Science Cannot Make Much Progress

Nothing Yet Discovered Which Will Aid Taste and Smell

While science knows something about taste and smell, it has been able to make little progress in moving or adding those organs to the body. Science is about the same state that it was in the Middle Ages as far as this field is concerned. Telescopes allow one to see stars invisible to the unaided eye; scales weigh masses too large to lift or too minute to feel; microscopes bring into relief the world of creatures too small to be seen; amplifiers magnify sounds inaudible to human ears, and ammeters measure electric currents too feeble to shock the most sensitive. But tongues and noses must struggle along without mechanical assistance.

"Blindness" to taste or smell is relatively common. There are chemical compounds that some people declare to be disagreeably bitter and others cannot taste at all. Similarly, the term verba smells to some and not to others. So science is still seeking ways to aid tongue and nose. Perhaps "microscopes" and odor amplifiers may be developed; and here is an opportunity for inventors.

Served Higher Purpose

That bottle picked up on a Yucatan beach after bobbing 5,150 miles in one year from the day it was tossed overboard will be regarded as having served a higher purpose in establishing the drift of ocean currents than in conveying a message to the mate's wife that he would be late in getting home for supper.

Creation of "super sheep," giving more and richer wool, has been made possible through gland transplantation, Dr. Berge Voronov declared at Grimaldi, Italy.

Overproduction, they say, has plunged agriculture into the \$x it is in. That is, if there were not so many good farmers there would not be so many poor farmers.

Bolivia has a shortage of merchandise, particularly luxuries.

Dickens delighted in ornamenting himself with costly jewelry.

Background For Exhibit

Map Of Canada Will Be Flood-Lighted At Chicago Exposition

History was made in Montreal when Gordon Hammond, internationally famous scenic artist, saw his latest effort, the largest map in the world, a map of Canada in colors, 30 by 130 feet, leave for the Century of Progress Exposition in Chicago where it will hang, framed and flood-lighted, as a breath-taking background for the Canadian exhibit in the great hall of the travel and transport building, in which the Dominion Government, the Canadian Pacific and the Canadian National Railways are participating.

The Canadian coat of arms in color, measuring approximately seven by eight feet and surmounted by the word "Canada" in huge cut-out letters, will hang from the centre of the map at the top and constitutes another record achievement in that it is the largest photographic enlargement made to date in the Dominion. The third record is that the complete map, models, dioramas, etc., have been completed in about three weeks when ordinarily the job would have taken three months. The result has been a real triumph for Canadian artists, Canadian material and Canadian methods.

The huge map, of course, will be the main attraction, containing as it does farming and mining areas, national parks, both trans-continental railway systems on general lines, principal resorts and cities, and three large cartouches or insets in which information concerning Canada as a land of opportunity for industry or tourists, is presented in condensed form. Its message is easy to grasp. Its huge size immediately impresses one with the vastness of the Dominion, and as one stands back from it, is then that Mr. Hammond's ability becomes evident. One has the sense of being high above the earth looking down at a scene stretching from the Aleutian Islands in Behring's Seas to Iceland and from the Arctic to Southern Illinois, in which every detail appears.

Solves One Problem

New York Church Replaces Choir With Record Music

The problem of maintaining a choir when economic conditions prohibit has been solved by the Presbyterian Church of the Convent at New York.

Phonograph records of choir singing are played and amplified at the Sunday evening services. The congregation sings to the accompaniment of electrical transcriptions of the choir music from famous churches all over the world. It has been contended more elaborate programmes can be offered than it could present with its own reduced choir.

Rotating Reserve Plan

U.S. Navy Department Abandons This System

The rotating reserve plan by which Admiral William V. Pratt, chief of naval operations, hoped to save a large sum through keeping one-third of the United States fleet in reserve has been abandoned by the navy department because a study shows the savings would be only \$5,000,000.

Secretary Claude Swanson, of the navy, said that only the destroyers and submarines now on a rotating reserve plan would be laid up at any time.

An Interesting Collection

The trustees of Shakespeare's birthplace are collecting in the manorial barn at Wilmcote, Stratford-on-Avon, a display of ancient agricultural implements mostly of local manufacture and craftsmanship. An appeal has been made for gifts of old time farming tools to help to illustrate the agricultural life of Shakespeare's England.

Employer: "You are, I suppose, strictly honest?" Applicant For Office Boy's Job: "Yes, sir—but at the same time I understand that business is business!"

Japan will expend \$41,000,000 in agricultural relief loans.

Stamp Fraud Laid Bare

Clever Machine Discovered In Britain To Defraud Government

Infrared ray, the remarkable scientific discovery which enables the camera to penetrate fog and darkness, has been the means of unmasking an astonishingly elaborate fraud on the inland revenue.

It is understood that Scotland Yard has been investigating the matter secretly for many months past, and it has now become evident that many thousands of pounds are involved.

The conspiracy to cheat the exchequer has been worked with complete success for years by a clever gang, who have found a means of obliterating the cancellation marks on the stamps issued by the post office for the payment of income tax. Thousands of the stamped cards, rendered by weekly wage-earners in payment of income tax have apparently been obtained by some means.

The stamps have been steamed and subjected to a cleaning process which has removed every mark of cancellation, and then sold at half their original face value.

The inland revenue authorities had not the slightest cause for suspicion until months ago, when someone noticed that the stamps had peeled off one of the cards sent to Somerset House.

It was at first surmised that the gummer must be at fault. The cards and the stamps were sent to the firm concerned. The gum was analysed and found to be different from that they had applied.

Even then the fraud was not suspected, but when more and more examples of re-gummed stamps came to light, experts were consulted. They declared the stamps were genuine, and the authorities remained mystified until some one suggested taking infra-red photographs.

Then the secret came to light. Numerous confessions have been obtained from income taxpayers who have admitted the purchase of stamps at half their face value from mysterious hawkers, and one after another of these hawkers have been found and interrogated, but the police have not been able to trace the reissued stamps to their original source.

Suggests Food Budget

U.S. Labor Department Gives Advice For Every Dollar

Heavy purchasing of milk, vegetables and fruit "if you have very little money for food" was recommended by the U.S. Labor Department in a leaflet, How To Spend Your Food Money. The pamphlet proposed the following as the best division of every food dollar available: Milk or its equivalent, 25 to 30 cents; vegetables and fruits, 25 to 30 cents; egg, lean meat and fish, ten cents; bread, flour and cereals, twenty cents; fat, sugar and accessories twenty cents.

One Kind Anyway

A clergyman one Sunday night preached from the text "Who is my neighbor?" and showed that it was "He that showed mercy on him." And all along some of us thought it was the fellow who broke our snow shovel last winter, and would be along in a few days to borrow our lawn mower.

Trinidad's record sugar crop is causing an increase in employment there.

CANADIANS HONORED AT MCGILL CONVOCATION

National Research Council Reports On Relative Value Of Various Feeds For Livestock

The pressure of the disastrously low prices of grain now being experienced has driven many members of the farming community to seek more profitable returns, by feeding their produce on the farm and marketing it in the form of livestock. This in turn has caused increased interest in the relative utility and value of the different grains for various classes of farm animals. The information contained in the recently published Report No. 28 of the National Research Council, "The Comparative Feeding Values for Livestock of Barley, Oats, Wheat, Rye and Corn" should therefore be of considerable practical value to farmers and stockmen at this time.

In a foreword to the Report Dr. R. Newton, Director of the Division of Biology and Agriculture of the National Research Council, states that the lack of authoritative published information on this question, and the desirability of summarizing the results of feeding experiments, particularly with regard to barley, a home-grown product, and corn, a product largely imported, have brought to the attention of the Associate Committee on Grain Research of the Council by officials of the wheat pool. Having ascertained that Professor E. W. Crampton of Macdonald College had already begun some work along this line, the Council made a grant to assist him in reviewing all the modern published literature conveniently available on the comparative value of barley, oats, wheat, rye and corn for feeding horses, cattle, sheep and swine. In this report Professor Crampton makes available the results of his inquiry.

For the purpose of his survey Professor Crampton has consulted 350 published accounts of feeding experiments conducted in 7 provinces of Canada, 20 States of the Union, and 8 overseas countries. Whenever possible, quantitative data regarding gains and feed consumption have been extracted from these accounts and tabulated according to the grain comparison and class of stock involved. It has thus been possible to arrive at average figures for rates of gain, gain per 100 lbs. of feed eaten, and other measures of efficiency, representing the combined experience of numerous different investigators. A statistical method has been employed to test the significance of all observed differences between the grains compared.

An encouraging feature of the findings is the indication obtained that in general the Canadian feeder is not handicapped by the lack of corn for fattening steers. Wheat actually appears to be more efficient than corn for hog fattening. The other grains, however, suffer somewhat by comparison with corn in this connection, and for sheep fattening all, including wheat, appear to be inferior to corn. In general the difference in efficiency seems to be roughly proportional to the amounts of fibre contained in the various feeds. Special characteristics, particularly in the case of rye, also limit to determine the usefulness of the several grains for special purposes or for certain feeding classes. The value of the Report to investigators is increased by a section in which Professor Crampton discusses the planning and reporting of stock-feeding experiments in the light of the lessons to be learned from the numerous trials examined in the course of this study.

A comprehensive summary of the findings which are discussed in detail in the body of the report is provided. Whilst it is anticipated that the report as a whole will probably be of interest mainly to investigators, this summary (which is being reprinted separately) contains in brief form much information of value and interest to practical stock men.

The report or the summary may be obtained upon application to the National Research Council or the Federal Department of Agriculture, Ottawa.

The Kind He Knew

Teacher was telling her class little stories in natural history, and she asked if any one could tell her what a groundhog was. Up went a little hand, waving frantically.

"Well, Carl, you may tell us what a groundhog is."

"Please, ma'am, it's a sausage."

Magistrate—"Why did you bite your husband's mother?"

Culpit—"Twas 'is fault, your worship. 'E was always throwin' 'er in my teeth."

A machine has been perfected in England that translates printed letters into sounds to enable blind persons to read books.

Porto Rico's present sugar crop is believed to be the third largest in this island's history.

About 360,000,000 pounds of cocoa are grown annually in the Gold Coast territory of Africa.

Mysteries Of The Sea

Every Coast Has Its Story Of Vanished Ships

The "Zebrina" was a sailing ship, and during the war was running between England and France under Government commission. One day she was found drifting derelict in the English Channel, a mile or two from Cherbourg.

She was not, obviously, a derelict. All her sails were properly set, and she was in first-class condition. But the way she was sailing prompted investigation and it was discovered that there was not a living soul on board. On the cabin table was a meal all ready for the eating; everything was in perfect order; there were no signs of a fight, or anything to account for the absence of master and men.

Yet they had all vanished completely, leaving no trace. Nothing has ever been heard of them since, nor the mystery of their disappearance explained.

They may have been victims of some enemy craft. That is the presumption. But the fact has never been established.

Another mystery of this character was the disappearance of the crew of the German fishing-boat "Seharnhorst," which one winter's day set out from its home port on a trip to the White Sea. It never returned. A long time afterwards, the vessel was found, locked in a mass of snow and ice, by the crew of a Norwegian vessel. There was nothing wrong with the ship, but the crew had vanished. Their fate is still a mystery.

The mystery of the American collier "Cyclops," whose disappearance during the war was never explained, is rapidly attaining the character of a sea legend among American sailing men. She vanished on her way out, "speaking" with another vessel flying the American flag, in a sea like a millpond. Not a single spar was ever found—nothing to give a hint of what happened to ship and crew.

Now and again on moonlit nights American seamen, who know he will have helped built up the legend concerning her by "seeing" her well-known lines clearly outlined for a moment or two on the horizon.

Every coast has its own story of some ship that has sailed away never to return, vanishing entirely without any word even coming of its fate; and of strange spectre-ships which afterwards haunt the waves. They are being added to, even in these days of enlightenment.

Convalescent Homes

Plan Would Greatly Reduce Hospital Expenditures In Ontario

Establishment of "convalescent homes" throughout Ontario would reduce hospital expenditures and at the same time benefit patients, Hon. Dr. H. A. Bruce, Lieutenant-Governor of Ontario, told the Ontario Medical Association.

Adoption of the plan would reduce the present hospital population by 30 to 40 per cent, he said, and would postpone for many years the expenditure of large sums of public money on new institutions.

"Hospital care is imposing a heavy charge upon the people," said his honor. "The per diem cost in modern hospitals is due to a large extent to modern facilities such as X-ray, operating equipment, and the services of a trained staff. These are required for one seriously ill but when a patient has ceased to be acutely ill he or she can be cared for equally as well in a convalescent home in the country, preferably on a small farm. Patients would have the advantage of country air and could be given light employment."

The report or the summary may be obtained upon application to the National Research Council or the Federal Department of Agriculture, Ottawa.

Woman Explorer Finds Assassins' Retreat

Miss Freya Stark Receives Award Of Geographical Society

Explorers in Antarctic wastes, African jungle, and Persian desert today have their services marked by medals presented by the King and grants by the Royal Geographical Society.

One of the awards—the Back Grant—goes to a woman. She is Miss Freya Stark, who last year discovered one of the last strongholds of the Assassins, a Mohammedan sect, whose rulers killed by poison and dagger for 600 years before the Crusaders went to Persia.

She found the battlements still standing, three large water cisterns cut in the rock, and what is probably the most unusual water supply system in the world—a tunnel down which wolves used to drive sheep with waterskins tied beneath them.

It takes sap from two or three maple trees to make a gallon of syrup. Britain now has more than 65,000 postmen.

Brazil expects bumper crops of coffee, rice and corn this season.

A number of prominent Canadians were honored at the McGill Convocation by the conferring of degrees. Perhaps the most prominent recipient was His Eminence Cardinal Villeneuve, Roman Catholic Archbishop of Quebec, who is shown above with a number of prominent personages at McGill University. Front row, left to right: Bishop Farthing, Anglican Bishop of Montreal; His Eminence Cardinal Villeneuve, and Senator Hon. A. J. Brown. Second row, in mortar boards, E. W. Beatty, President of the Canadian Pacific Railway, who is Chancellor of the University; Sir Arthur W. Currie, and on his left in gown, Mr. J. H. Ross. Back row, Col. Herbert Molson, W. A. Black, Hon. Vincent Massey, who also received the degree of Doctor of Laws, and Mr. Henry Birks. In the doorway is Mr. Huntley Drummond.

Would Honor Captain Bernier

Parliament Likely To Recognize Services Of Veteran Arctic Explorer

In the Senate recently the Hon. J. P. B. Casgrain made the proposal, which was promptly endorsed by the Government leader, the Rt. Hon. Arthur Meighen, that Parliament should make suitable recognition of the services performed by Captain J. E. Bernier, the veteran Arctic explorer, who has contributed greatly to the knowledge possessed by Canadians of the value and extent of their Arctic resources. Captain Bernier is now in his 82nd year, old as far as age is counted but still as interested as ever in the Canadian Arctic and its resources. He went to sea for the first time when only twelve years of age and he continued to sail as long as health permitted, for many years with the Arctic regions as his destination. Important public service was rendered by him in the course of his periodical voyages into northern waters, sometimes with the object of formally taking possession of certain lands in the name of the Dominion, and at one time he planned an independent Canadian expedition for the discovery of the North Pole. There are very few people who know as much about the Canadian Arctic regions as Captain Bernier.

A resident of Brador Bay, Quebec, a little village near the west end of the Strait of Belle Isle, while out hunting flushed a drake plucked from a small pond and shot it. When he picked up his bird he was surprised to find a small ring of aluminum on one of its legs. On examination he discovered that the band bore a name and Danish address stamped on it. The band was preserved and later shown to a member of the Migratory Bird protection staff of the Department of the Interior. The matter was reported to Ottawa and as a result of the inquiries instituted in Denmark it was revealed that the duck had been banded when yet a duckling on June 30, 1930, in Aildal, northern Iceland, and later released.

The marking of wild birds of many kinds with numbered aluminum bands is a method of investigation increasingly used by scientists in Europe, North America, and Japan, that is yielding surprising and valuable information. In North America this work is carried on as a joint project by the National Parks Branch of the Canadian Department of the Interior and by the Biological Survey of the United States Department of Agriculture. Canadians wishing to assist in placing such bands must first obtain permits from the Department of the Interior, but all persons finding such birds on wild birds or their remains are requested to notify the Commissioner of the National Parks of Canada, Department of the Interior, Ottawa, quoting the number of the band and stating when and where it was discovered, so as to aid in this unusual research.

Bird Banding In Canada

Band On Pintail Duck Shot In Quebec Reveals Bird Came From Iceland

The study of the migration of birds and particularly the movements of those protected on this continent under the provisions of the Migratory Birds Convention is carried on in Canada and the United States as a joint effort by the departments of government concerned. Aluminum bands are used in this study and much interesting and valuable data has been compiled. As a result of banding operations, a tagged wild duck of the pintail or sprig variety that was killed in the eastern part of the province of Quebec last year has now been found to have come from Iceland, where it was hatched.

Pintails are not uncommon on this continent as they nest in large numbers in Western and Northern Canada (as well as in Europe and Asia), and they are often seen on migration in the province of Quebec, but this is the first known case of a pintail from Iceland being shot in North America.

A resident of Brador Bay, Quebec, a little village near the west end of the Strait of Belle Isle, while out hunting flushed a drake plucked from a small pond and shot it. When he picked up his bird he was surprised to find a small ring of aluminum on one of its legs. On examination he discovered that the band bore a name and Danish address stamped on it. The band was preserved and later shown to a member of the Migratory Bird protection staff of the Department of the Interior. The matter was reported to Ottawa and as a result of the inquiries instituted in Denmark it was revealed that the duck had been banded when yet a duckling on June 30, 1930, in Aildal, northern Iceland, and later released.

The marking of wild birds of many kinds with numbered aluminum bands is a method of investigation increasingly used by scientists in Europe, North America, and Japan, that is yielding surprising and valuable information. In North America this work is carried on as a joint project by the National Parks Branch of the Canadian Department of the Interior and by the Biological Survey of the United States Department of Agriculture. Canadians wishing to assist in placing such bands must first obtain permits from the Department of the Interior, but all persons finding such birds on wild birds or their remains are requested to notify the Commissioner of the National Parks of Canada, Department of the Interior, Ottawa, quoting the number of the band and stating when and where it was discovered, so as to aid in this unusual research.

New Treatment For Arthritis

Offers New Outlook To Victims Of Painful Disease

Development of a new treatment along the lines of body immunity offers a better outlook to victims of arthritis was announced before the 54th annual meeting of the Ontario Medical Association at Hamilton, Ontario.

Dr. W. S. Barnhart, of Ottawa, said the ailment still constituted one of the most difficult problems of specialists in internal medicine.

Treatment has been variable with variable success, he said. Vaccines have been used and diets advocated. The treatment under development has on cases treated along the lines of body immunity offered a better outlook to sufferers from the disease.

Some Truth In It

European Women Old-Fashioned and Therefore May Be Better Off

Miss. Andrea Collin, one of the few women executives on the League of Nations staff, believes her European sisters are better off than United States women because they are old-fashioned. "Because women in Europe have kept so very much to the old-fashioned women's way of life they are much less affected by current economic conditions than your women here," she said. "The younger woman of Europe looks to getting married as a goal in life, not to finding jobs and careers. I do not like young mothers for office workers. One of two things suffer, the home or the job."

Register office marriages grow more popular in England each year, there being 100,000 such unions last year.

Methods of controlling weeds in growing crops by sulphuric acid sprays are in vogue in France.

Billions In Gold Lost

Many Ways Through Which World's Supply Has Been Depleted

Lost from the face of the earth; \$5,000,000,000 in gold! The thing appears to be incredible but the United States Bureau of Mines is authority for the assurance that it is absolutely true, nonetheless.

According to the U.S. Bureau the total output of gold since the production of the world's mines was first recorded in 1792, has been 1,085,000 ounces, which is valued at about \$18,000,000,000.

Now the present gold holdings of the world for currency purposes are roughly \$11,250,000,000, and for the arts, jewelry and other purposes some \$2,000,000,000, so that a balance of \$5,000,000,000 remains unaccounted for. Where the missing gold has gone can only be surmised but certainly a share of it lies on the ocean floor. Scattered over the world, in forgotten or inaccessible places, lie literally hundreds—perhaps thousands—of treasure ships wrecked by storm or internal weakness, scuttled by close-harried freebooters or stricken down in warfare.

Other millions, if not billions, rest in unmarked graves, hiding places of landbound freebooters too hard-pressed by law or enemy to take with them to safety. Add to this the normal loss of gold by abrasion in ordinary handling, and the probable millions of loss have been covered.

Carbon Black Plant

Proposal For Another Absorption Plant At Turner Valley

Proposals for another absorption and carbon black plant for Turner Valley, involving expenditure of about \$1,000,000, was being discussed by independent oil operators at Calgary.

The proposal was disclosed by Mr. Merriweather, of Los Angeles, who announced a syndicate was preparing plans for construction of the plant. Next winter provided all independent operators would give their support and suitable arrangements could be made.

Preliminary plans provide for production of 11,000,000 gallons of gasoline from the waste gas of the valley, and 18,000 tons of carbon black.

A group of independent oil operators is already studying one plan for an absorption and carbon black plant and Royaltie Oil Company put into operation May 1 its absorption plant.

The total area of land permanently dedicated to forestry in forest reserves of the Dominion and provincial parks throughout the Dominion of Canada is now according to figures given by the Forest Service, Department of the Interior, 149,930 square miles.

Boston Latin School is the oldest free public school in the U.S.; it is now in its 298th year.

Nine hundred pupils from 93 public schools in England recently cruised the Mediterranean.

Many thousands of laborers are harvesting this year's large sugar crop (Saskatchewan), and Professor J. F. (Saskatchewan).

The following joint sub-committees were formed to study, assemble and exchange information on the following subjects:

Committee on Soils: Professor J. H. Ellis (Manitoba), Professor Joel (Saskatchewan), and Professor F. (Saskatchewan).

Committee on Forests: Hon. James F. Bryant (Saskatchewan), Col. H. J. Stephenson (Manitoba), and T. F. Biegan (Alberta).

Committee on Water: Dean C. J. MacKenzie (Saskatchewan), C. H. Atwood (Manitoba), and Dr. Ruth-erford (University of Alberta).

It was agreed that as work was carried on and results obtained, all data should be made available to the central Committee so that the provincial Commissions can keep in touch with one another and obtain all data available.

Transportation By Air

Aeroplane Makes Possible Industrial Development In Remote Areas

It is now about seven years since aircraft of a type which could be considered at all efficient were made available in Canada for the transportation of equipment and supplies into the mining areas.

Since 1926—the year of the Red Lake rush—a steady increasing use of aircraft has resulted in yearly augmented totals of mileage flown and freight carried.

Despite the fact that the eastern inter-city and prairie air mail services were discontinued in March, 1932, a comparison of the yearly totals for 1931 and 1932 shows that Canadian Airways alone carried nearly 80 per cent more freight and more passengers despite the fewer hours and mileage flown.

This increase is largely accounted for by the activity in the Great Bear area and whatever the future of Great Bear may be, it has at least served one purpose well—demonstrating to the public that provided the facilities afforded by aerial transportation are available, no part of this Dominion is too remote for industrial development.—(W. B. Burchall in the Financial Post.)

Joint Commission On Conservation and Afforestation Hold Meeting at Regina

The joint Commission on Conservation and Afforestation of the prairie provinces of Canada, held its inaugural meeting in the Parliament Buildings recently in Regina.

There were present the following members of the Provincial Commissions on Conservation and Afforestation: Representing Saskatchewan—Hon. James F. Bryant, W. D. Cowan, M.D., M.P., Professor C. J. McKen- zie, Dean of Engineering of the University of Saskatchewan and T. A. Patrick, M.D., Yorkton Representing Alberta—Hon. R. G. Reid, Provincial Treasurer and Minister of Natural Resources for Alberta. Representing Manitoba—C. H. Atwood, Deputy Minister of Natural Resources and Industries, Col. H. J. Stephenson, Provincial Forester and Professor J. H. Ellis, Professor of Soils, Agronomy Department, University of Manitoba.

It was agreed to establish a joint Manitoba-Saskatchewan-Alberta Commission, with the provincial committees collaborating under one chairman. It was distinctly understood that the joint committee functions in the matter of assembling and acquiring data in a co-operative way only and does not bind the respective provinces to any individual action but exists solely for the purpose of making recommendations.

Hon. James W. Bryant, Chairman of the Saskatchewan Commission was elected chairman of the joint commission. The Commission then drew up an agenda and discussed the following matters in relation to the work to be undertaken:

1. Climate. 2. Afforestation. 3. Conservation, under the following heads: (a) Water; (b) Forests; (c) Soils; (d) Scenic beauties; (e) Game; (f) Fish; (g) Bird life; (h) Fur bearing animals. 4. Drought problems and how to meet them.

The following programme was adopted as the aims and objects of the joint Commission.

Aims:—1. To institute a scientific research of climatic conditions in the prairie provinces.

2. To apply the results of said research to the problems facing each community in the western provinces with particular reference to provincial administration with respect to agriculture, forestry, game, fur bearing animals, and settlement and water resources.

The objects of the joint commissions work are:—(a) Conservation of water; (b) Prevention of erosion and soil drifting; (c) Soil survey and land utilization studies; (d) Better land location and types; (e) Reserving for forestry purposes all areas unsuited for agricultural purposes; (f) Forestation of areas unsuited for agricultural purposes; (g) Conservation of forests and thereby providing shelter and preservation of game, fur bearing, recreational areas and industries depending on the forests and forest products.

Stress was laid on the importance of the soil surveys in relation to settlement, and also in particular with regard to the type of tree species to be recommended for each locality.

The joint commission made several recommendations which were passed on to the provincial commissions for study and experimentation, among them the removal of different species of trees on sandy soils where the water table was low and also species suitable for soils where the water table was high and drainage good.

The following among other resolutions were passed:

"That areas which are not suitable for agriculture purposes, and withdrawn from settlement and reserved for forestry purposes, and that the several provincial Commissions be urged to study the feasibility of forestation of such areas as seems suitable, attention being especially called to the desirability of planting or continuing in forests the headwaters of all streams."

"That this joint Commission on Conservation and Afforestation desires to place on record its appreciation of the splendid work carried on by the forestry firms under the Federal Government. The Commission recognizes with appreciation the leadership in the matter of tree planting in the prairie provinces given by Norman M. Ross, of Indian Head, Chief of the Forestry work in Western Canada. The joint Commission also desires to express appreciation of the splendid educational work in the matter of tree planting being done by the Canadian Forestry Association through their tree planting car."

"That this joint Commission appreciates the co-operative effort in the matter of soil survey between the Dominion and the provinces and urges that this work be continued and extended as much as possible."

The following joint sub-committees were formed to study, assemble and exchange information on the following subjects:

Committee on Soils: Professor J. H. Ellis (Manitoba), Professor Joel (Saskatchewan), and Professor F. (Saskatchewan).

Committee on Forests: Hon. James F. Bryant (Saskatchewan), Col. H. J. Stephenson (Manitoba), and T. F. Biegan (Alberta).

Committee on Water: Dean C. J. MacKenzie (Saskatchewan), C. H. Atwood (Manitoba), and Dr. Ruth-erford (University of Alberta).

It was agreed that as work was carried on and results obtained, all data should be made available to the central Committee so that the provincial Commissions can keep in touch with one another and obtain all data available.

Time About the Same

1908 Record For Atlantic Crossing Shortened Very Little

Although the Conte di Savoia failed by a narrow margin to set a new trans-Atlantic record of the "Europa" and "Bremen," her passage from Genoa to New York marks a new triumph for Italy in the continuing international rivalry in ocean travel. By reaching this city five days and twenty-two hours after leaving Genoa, the Italian liner has cut no less than fourteen hours from the best previous record for a crossing from a Mediterranean port. It is no longer possible to think of the southern route to Europe as one which is necessarily long and leisurely when the entire trip takes only six days, with stops at both Gibraltar and Villafraña. Nevertheless, an interesting indication of how comparatively little the period for crossing the Atlantic has been shortened in the past two decades is found in the fact that the time required for the "Conte di Savoia" to sail from Gibraltar to New York—four days and fifteen hours—was exactly the time of the Lusitania's first record-breaking voyage from Queenstown in 1908.—New York Evening Post.

THE WILSON FLY PAD CO., Hamilton, Ont.

A meeting of Gull Lake Sports Club was held on Monday evening, and it was decided that a set of Baseball Uniforms and supplies be purchased for the Gull Lake team. The team has been practicing regularly and will meet the Lincoln team on Sunday afternoon at 2 p.m.

A dance will be held in Fernies Hall to raise funds for the purchase of the Baseball outfit.

MECHANIC MOTORS

Mechanic Motors garage which is located in the building on Delmage Street (formerly occupied by Bob Park's) is now open for business. A staff of high class mechanics are ready to attend to your automobile troubles, and first class work is assured. Dry-seal welding is a specialty of this establishment, and under the rigid supervision of Pete Anderson, all welding jobs are sure to meet with your approval. Pete is an expert welder and body-man, so if your car is damaged, let Pete attend to it, he can make a wrecked car look like a new one. Henry Howe and Godfrey Johnston, both expert mechanics absolutely guarantee that any motor job done by them will give you lasting satisfaction. Before you start on your summer trip, call around to Mechanic Motors and have your motor, wiring, battery and brakes checked—if there is anything wrong with the mechanism of your car, they will tell you and if there is not, they will tell you. Give them a trial on your next car job.

WOMEN'S INSTITUTE

The regular meeting of the Lacombe W.I. will be a special afternoon, at the home of Mrs. H. Reed, on Friday, June 30th. Roll Call: "My Funniest Adventure." Lunch and Entertaining Committee: Mesdames Teward, Todd, J. Roberts, Vaughan, and Cranna. The Constitution Convention will be held at Rimbey, July 6th.

STEWART WALDERN DIES
From the effects of a fall from a tree a few days ago Stewart George Waldern, 16-year-old son of Mr. and Mrs. Geo. Waldern, Clive, died on Tuesday at Lacombe hospital. The funeral is being held today at Clive. The bereaved family have the sympathy of their many friends in the Community.

SHORTHORN FIELD DAY AT LACOMBE

Monday, July 17
The Dominion Experimental Station at Lacombe is centrally located in the Province. The large grounds provide excellent facilities for the holding of "Field Days" and with a very wide range of experiments under way, covering live stock, poultry, bees, horticulture and fields crops, there are always many object lessons to interest and benefit farmers. During the summer a number of field days will be held at the Experimental Station, but one of the most interesting should be the Shorthorn Breeders' Day on Monday, July 17.

The field day will be held under the auspices of the Alberta Shorthorn Breeders' Association, and the breeding work with Shorthorns will be specially featured, but an opportunity will be provided to inspect all branches of the experimental work. The Shorthorn Breeders have been fortunate in being able to arrange for their Field Day at the time of the visit to the Experimental Station of the Hon. Robert Weir, Minister of Agriculture, and Dr. Barton, recently appointed deputy Minister of Agriculture for Canada. Mr. Newman, Dominion Cerealist, and Mr. Muir, Dominion Animal Husbandman, will be with the Minister. Mr. Newman is in charge of experimental work with cereals, and Mr. Muir is in charge of experimental work with live stock on all of the Dominion Government farms throughout Canada. Both men are authorities on their subjects and will be able to give much valuable information to anyone attending the Field Day.

Come early and inspect the hedges, trees, shrubs and flowers before lunch. Bring your baskets for a picnic lunch. Coffee, cream and sugar will be provided. The programme will commence at 1:30. This will consist of addresses by the Hon. Mr. Weir and a few other prominent men, followed by a parade and inspection of the Clydesdales and Shorthorns at the Station, and a drive around the farm to inspect the field crops. Later a number of Classes of Shorthorns will be judged and fully discussed, and this should be one of the most interesting features of the day.

LET US FORGET

CLUB MEETING

The regular meeting of The Let Us Forget Club was held at the home of Mrs. C. B. Halpin last evening. Sixteen members were in attendance. After the usual routine business was transacted, a social time was spent in cards, etc., during which Mrs. Wilson Ritson, the president, who leaves on Saturday for a trip to her old home in England, was presented with a beautiful travelling bag. Mr. Ritson was also the recipient of a leather bill fold from the Club, in recognition of his services so heartily rendered.

Mr. Jacobson will be in Lacombe, Tuesday and Wednesday, June 27 and 28, giving Permanent Waves in the Cosy Beauty Shop. Phone 23.
Stump Puller for Sale or will trade for Feed Grain. Write Hugh Rowland, Lacombe.

EDMONTON DOCTORS WIN GOLF TOURNAMENT

The Annual Golf Tournament between the Doctors of Calgary and those of Edmonton was held on Saturday afternoon with the Edmonton Team winning by the small margin of 14.

There were 14 Medics from each of the cities in the competition for the MacEachern Trophy donated by Dr. I. W. T. MacEachern, of Edmonton and Dr. MacEachern, of Calgary.

After the Tournament dinner was served in the Club House and several speeches were made, by members to both teams. The participants expressed themselves as well pleased with the reception given them; also of the Lacombe Golf Course, which was, they said among the best in Alberta, being unique in that it had no artificial hazards, and its natural beauty, made it a pleasure to play over it.

Arrangements were in charge of Dr. Parke, of Calgary and Dr. Hepburn, of Edmonton, with J. T. Jackson, making local arrangements.

LINCOLN NEWS

Wm. Ross and Wm. Dool left on Monday for Buck Lake. Carl Christensen and Hemlin Johnson are busy burning lime at Gull Lake, so get ready for lime washing. Congratulations are being extended to Mr. and Mrs. Roy Sweet on the birth of a daughter. Martin Stone and his friends Swinn have been taking a short holiday in Calgary.

Jim Hill sold 1000 bushels of three year old No. 1 Marquis Wheat to the Lacombe Flour Mill this week. Yours for the best and purest flour you can buy.

FAIRVIEW NEWS

Mr. Fred McMullen left Saturday for a trip to New Brunswick and Nova Scotia where he will spend sometime.
The play entitled 'Mary Made Some Marmalade' was put on at Lacombe on June 16, by the Fairview Dramatic Club and was very largely attended. This was the third time that this play has been put on with great success and as usual the audience was enthusiastic in their praise of the play and the selection of the players, each character being admirably suited for their parts. On July 7 this play will be put on at Lincoln Hall. This should be the most successful performance, as it is the first time the players and audience are acquainted of ample room. Free lunch will be provided after the play and a dance will immediately follow, put on by the Community Hall Board.
The Meadow Larks, an excellent five piece orchestra will be in attendance both for the play and dance. Don't forget the big night, July 7.
Mr. and Mrs. Albert Powers spent Sunday with Mr. and Mrs. Joe Clague.
Mr. L. P. Oulton, attended a Political meeting at Sylvan Lake on Saturday. Mr. Stevens being able speaker.
Friends of Mrs. John Finlay are very sorry to hear of her illness and hope soon to hear of her recovery.
Miss Elsie Bruns is spending a few weeks at Sylvan Lake.
Mr. Brazz and Son were Sunday guests at the home of Mr. and Mrs. George Brown.
We are glad to welcome our new neighbors, Mr. and Mrs. William Ochs.
Don't forget the ice cream social in Fairview hall on Friday evening, June 23.

MEADOWBROOK
Miss May Carter of Camrose is visiting with her sister Mrs. Chris. Huseby.
We were all very glad to have our old friend Mr. Matthews with us again last Sunday, he preached a good sermon.
A very large crowd gathered to see the baseball game at Will Riley's on June 18th. Meadowbrook and Lincoln played the game. Lincoln was beaten by Meadowbrook by the 20 to 7. It was a fast and furious game. Don't miss the next one, Meadowbrook vs. Lincoln, on Sunday, July 2nd, at Henry Kamiah's. This should be a real game.
Mrs. J. Heath who has been visiting with relatives here, has returned to her home in Camrose.

SPRUCEVILLE NEWS
We are sorry to hear that Mr. Magilton's health is not improving, he was taken to Edmonton on Wednesday to the University hospital.
A few from the district motored to Ponoka Thursday night to attend the U.F.W.A. conference.
Mr. James Reid returned home on Sunday after paying a short visit to his son at Daysland.
The dance on Friday was well attended and everyone reported a good time.
Mr. and Mrs. W. Parker spent Sunday with Mr. and Mrs. Hall of Morningstar.
Mr. Roy Rice has been appointed road foreman for Div. 3.
Congratulations to Mr. and Mrs. Ed. Hunt on the arrival of a baby boy last Sunday.
Remember the joint meeting of the U.F.A. and the Young People on Friday, 23rd.

A BIRTHDAY CELEBRATION

Alexandre Chapter No. 4 O.E.S. of Lacombe celebrated its 25th birthday, June 8th.
Many guests were present from Wetaskiwin, Stettin, Ponoka and Red Deer. A very acceptable program of music and recitations was given.
Mr. Wright with his orchestra rendered some appropriate music between items on the program.
Mr. Wright also led in the Community singing and gave some very comic recitation which elicited rounds of applause.
Mr. and Mrs. Wilkes and Miss Helen Warwick were among the artists who delighted the ears of all, as was also Walter Taylor who rendered two very beautiful violin solos. Little Bertie Orlans in his inimitable singing was the hit of the evening.
Mr. Bowker of Ponoka rendered two of Drummond's poems in a masterly manner, as his French Habitant accent and gestures were simply perfect. There is no need of telling the Lacombe people who have had the pleasure of hearing Mr. and Mrs. Wilkes and Helen Warwick how very much the guests appreciated their numbers. A most amusing farce was put on by some of the members of Alexandre depicting a Masonic lodge in session. They even led the goat there for the candidate, all decorated in supposedly Masonic badges. It brought down the house. Mr. F. Watson, of Wetaskiwin who had been a Charter Member of Alexandre Chapter came to the platform and congratulated us on the happy birthday event as did Frank George, a former member here, in very fitting words and a most pleasing manner.
A dainty lunch was served by the ladies, the tables being decorated in the colors of the Order. A beautiful birthday cake mounted on a large star and surrounded by the requisite number of candles centered one of the tables. The Worthy Matron Mrs. W. J. Taylor who sponsored the event has the thanks and appreciation of all those who had the pleasure of being there.

UNITED CHURCH CAMP AT GULL LAKE

The United Camp at Gull Lake, although organized originally only for the boys and girls of the Lacombe Presbytery, has made such a reputation that applications are coming in from districts outside. Already six applications have come from Didsbury, and five from Edmonton, as well as from points in between. With Rev. T. B. Davies, as Director for the Boys' Camp, and Miss Beth Carcallen, B.A., for the Girls' there will be no question about successful Camps for this year. The other Leaders will be selected when further applications are received, with one leader for each eight Campers.

ST. ANDREW'S UNITED CHURCH

Pastor Rev. R. B. Layton
Musical Director
Mr. L. D. Wright, G.U.E.C.C.
Sunday, June 25
11:00 a.m. Morning service and Sunday School.
7:30 p.m. Masonic service.
Anthem: "Hark, Hark My Soul."
Duet: Miss Warwick and Mrs. Wilkes
July 1st: Congregational Picnic at Meridian Beach; Bagel lunch.
Boys' camp at Meridian Beach opens July 3rd. Girl's Camp on July 12th.

PRESBYTERIAL PICNIC

Arrangements were made to hold the Presbyterial picnic at Meridian Beach on Wednesday, July 26th. It was reported at the meeting of the W.M.S., held at the home of Mrs. Hugh Reed on Tuesday last and Mrs. W. C. Sweet and Mrs. Danner were appointed a committee to solicit refreshments.
34 children of pre-school age had attended the Baby Band picnic held at the Experimental Farm on Friday, under the supervision of the Superintendent, Mrs. Geo. Ramsay.
The program as drawn up for the succeeding year, by which each Secretary is responsible for one meeting was accepted. Eight subscriptions were handed in for the Blue Book.
Devotional exercises were led by Mrs. F. McDonald on 'The Society Woman' (Lot's Wife), which stressed the importance of seeking first the Kingdom of Righteousness instead of placing selfish pleasure first.
Temperance Secretary read an article urging the people of the Church to rouse from their apathy and indifference toward the liquor question.
Study Topic on 'Fifty Years in Japan' was taken by Mesdames Sweet, H. E. Carruthers, P. MacDonald and Layton.

A 115-Year-Old CANADIAN INSTITUTION

That Is Still Young

The strength of Canada is in her youthful, pioneering, ever forward-facing, courageous spirit, tempered with old wisdom. Canada's strength is the composite strength of her constituents—institutions as well as individuals.

The Bank of Montreal, 115 years old and true to Canadian history and tradition, applies its experience and adjusts its service constantly to changing conditions, to the end that it may provide safe, helpful and convenient banking for the people and business of the Dominion.

THE FIGHT—TONIGHT

Everything is in readiness for the big fight at the Lacombe arena tonight. Last minute reports show that there will be a large attendance. Fans from all surrounding towns are enthusiastic and many tickets have been taken. It will be a real fight from the main bout to the last preliminary. The fighters on the card are all here and some have been in training at our gym for some weeks. If you have not got your ticket yet get it now at McDermid Drug Co., while you still have a chance to get a good seat.

MORE TROUBLE FOR

HON. McPHERSON
W. F. Payne, M.P., Red Deer, has had his eyes opened by alleged irregularities in the department of public works.
"Speaking at Rocky Mountain House, Mr. Payne stated that Alberta had not heard the last of the highway investigation, and said that the contractors who built the highway from Sylvan Lake to Alhambra had been paid some \$1700 for grubbing which had never been done as the right of way had been cleared years before."

HEALTH CLINICS AT BENTLEY AND LOCKART

"The Red Deer Health District will hold a Baby and Pre-school Clinic in the Community Hall at Bentley on Tuesday, June 27th, from 1:30 to 4:30 p.m. The children may be vaccinated at this clinic also, if desired."
"The Red Deer Health District will hold a Baby and Pre-school Clinic in the Community Hall at Lockhart on Thursday, June 29th, from 1:30 to 4:30 p.m. The children may be vaccinated at this clinic also, if desired."

ALIX NEWS

Mrs. Hazel McDermott, who has been on the telephone exchange here for several months, returns to her home at Lacombe this week end. Her place at the switch is being taken by Miss Pauline Gail who arrived in town on Thursday last week and is staying with her sister, Mrs. Benson.

Returning from Lacombe on Saturday last, and when three miles out of town one of the wheels on the truck driven by W. Findlater parted company. The machine took to the ditch and was considerably wrecked, but Bill got out of the mess unhurt. Mr. Fred Stone returned from Montreal on Thursday last week to holiday with his parents Mr. and Mrs. Chas. Stone. We are pleased

to learn that he now has his M.A. degree. He will return to the University this fall. At present he and Bob are having a week in and around Banff.

Fourteen Years Ago

Fourteen years ago, Alcock and Brown flew the Atlantic for the first time. In a 1919 Vickers bomber three British pilots flew from Newfoundland to Ireland in 16 hours and 12 minutes, creating a record which stood until Amelia Earhart cut it by three hours.

Sir John Alcock is dead and the story of his exploit with Sir Arthur Whitten Brown is an old one.

Yet we are tempted to remember this anniversary and to draw attention to it editorially year after year, because these men never seem to have received their due from the public.

They were the true adventurers. They flew in a crazy old crate of a machine; they depended for success upon a wind which blew them across

into an Irish peat bog; theirs was the uncertainty of men who are gambling upon the elements and their own luck and theirs was the thrill of the first achievement.

INDUCTION SERVICES

The Presbytery of Lacombe will induct three ministers at the end of this month: Rev. A. E. Hayes, B.A., at Fairview Church at eight o'clock on Wednesday, June 28th; Rev. A. E. Parker, M.A., B.D., in Millett Church, at eight o'clock on Thursday, June 29th; and Rev. George Young, B.A., B.D., in Rimby Church at eight o'clock, June 30th. Rev. T. R. Davies, B.D., will preside at these meetings. Revs. R. B. Layton and W. B. Lord will speak at Fairview; and Rev. Davies and Layton at Rimby.

EQUIPPED FARM FOR SALE

Or Trade for Vancouver acreage. 160 acres with 20 head cattle; 5 horses, harness, farm machinery and household goods. J. W. Wilkie.

THAT DEPRESSED FEELING IS LARGELY LIVER

Wake up your Liver Bile

—Without Calomel
You are "feeling punk" simply because your liver isn't pouring its daily two pounds of liquid bile into your bowels. Digestion and elimination are both hampered, and your entire system is being poisoned.
What you need is a liver stimulant. Something that goes farther than salts, mineral water, oil, laxative candy or chewing gum or roughage which only move the bowels—ignoring the real cause of trouble, your liver.
Take Carter's Little Liver Pills. Purely vegetable. No harm calomel (mercury) safe. Sure. Ask for them by name. Refuse substitutes. See us at all druggists.

HOGS FOR SALE

Purebred Tamworth boar, also a number of young sows. Call or see F. F. Tracey, or apply this office.

WORK WANTED

Washing, housecleaning or general housework wanted, by day or hour. Phone this office.

FOR SALE

Photography in good condition for sale at a snap. 18 records. \$15.00. Apply Miss Fife, College Heights P.O.

Sir James Crichton-Browne, pre-eminent in the British Medical World, declares:

"Beer—our national beverage—is the most truly nourishing of alcoholic drinks, and its use in moderation is well calculated to decrease susceptibility to fatigue and the headaches and despondency of those who are over-wrought and worried. Beer is not only a readily assimilable food, but it promotes the assimilation of other foods."
